

Amy Young

Product and Program Manager | AI and Agentic Systems | Data Analytics | Research Operations | Digital Marketing

Email: amy@amyyoung.me | Location: Seattle, Washington | LinkedIn: linkedin.com/in/amyyoung-data-ai | amyyoung.me

PROFESSIONAL SUMMARY

Program and platform manager with deep expertise in research operations, data systems, and digital communications, now applying AI tools, autonomous agents, and workflow automation to high-complexity knowledge work. Proven track record leading national-scale programs in the Alzheimer's research community, growing participation 200 to 350 percent through strategic outreach and platform innovation. Graduate of the University of Washington's MSIM program (2024) with specializations in data analytics and product management. Currently designing AI training programs and knowledge architecture systems at the intersection of research, technology, and organizational change.

SKILLS

AI and Agentic Systems: Agent harness design (Claude Code hooks, permissions, tool allowlisting, deterministic vs. judgment task routing); knowledge graph engineering (Postgres, PostgREST, custom MCP capture layer, LLM entity extraction across 1,800+ entities); MCP integrations (custom MCP server plus Asana, Gmail, Google Calendar, Google Drive, PubMed, Postgres); API and CLI integration (custom Python clients, OpenAI Whisper, Google Drive and YouTube, REDCap, Docker, GitHub CLI); n8n workflow automation for document and video ingestion; deterministic retrieval across large corpora; Anthropic Claude API and SDK.

Developer Tooling: Claude Code (30+ custom skills authored, memory architecture design); VS Code; working fluency across the AI coding tool landscape (Claude Code, Cursor, OpenAI Codex).

Market Research: Quantitative and qualitative research methods; web and marketing platform analysis; competitor profiling; voice of customer research; real-time social and market intelligence tooling (Reddit, X, YouTube, Hacker News, Polymarket, GitHub); FireCrawl; Perplexity API.

Data and Analytics: REDCap; Qualtrics; SQL and PostgreSQL; R, RStudio, and SPSS; Tableau and Microsoft Power BI.

Web Development: Astro; WordPress; Tailwind CSS; Claude Design, Lovable, and Replit; site and information architecture; SEO and AI answer-engine optimization. Sites are built and shipped inside a self-built agent harness rather than by hand, with the design system and the deploy loop both encoded as authored Claude Code skills.

Infrastructure: Self-managed Hostinger VPS (Ubuntu 24.04, Docker); Docker Compose multi-application stack (n8n, KaraKeep, Firecrawl, Watchtower, Vikunja, PostgREST); Caddy reverse proxy; Tailscale private networking; VPS security hardening.

Communication and Design: Copywriting; brand design and development; email marketing; CRM development and management; report and presentation design; UX/UI; training and educational content; institutional and brand-compliant technical communications.

EXPERIENCE

Public Information Specialist

National Alzheimer's Coordinating Center (NACC), University of Washington

March 2021 - Present

- Strategic program management: direct key organizational initiatives including the New Investigator Award Program and the NACC Directory, serving the national Alzheimer's research community across 37 Alzheimer's Disease Research Centers.
- Stakeholder engagement: maintain relationships across NACC, the ADRC network, the National Institute on Aging, and the wider AD/ADRD research community.
- Database management: design and manage NACC's researcher database, a 1,500+ variable system that powers communications, data platform access, surveys, funding programs, publications, and ADRC leadership opportunities.
- Communications: lead content development for the New Investigator Award Program, the ADRC Research Education Component, development of NACC's new website naccdata.org, and instructional and support content for the ADRC researcher database and NACC Data Platform onboarding. Previously led communications for the hybrid bi-annual ADRC Meetings from 2021 to 2026, growing attendance from 320 to 1,379 and setting a record at every meeting, then trained a successor into the role.
- Research and dissemination: conduct research studies for the New Investigator Award Program and NACC's research education work, and present findings to a national audience, including a report on trends in Alzheimer's disease and related dementias among new and early-career investigators delivered at the 2025 Fall ADRC Meeting.
- AI integration: apply AI across the role, including content, web development, design, publishing, funding research, workflow automation, and presentations, tuned to a research community where the domain detail has to be right.

Digital Marketing and Research Manager

ZenCloud Consulting

October 2012 - March 2021

- Cross-functional leadership: led multidisciplinary teams of researchers, web developers, writers, and designers through product development and marketing campaigns.
- Higher education partnerships: directed digital products and strategic communications for the University of Washington and Cornell University.
- Strategic market research: created the strategic marketing plan for UW's BRiTE Center through executive-level interviews with Google and Fortune 500 technology and healthcare organizations.
- Brand strategy: developed brand and market strategy for Cornell's Yang-Tan Institute, gathering insights from HR and diversity directors at multinational corporations.

KEY PROJECTS

New Investigator Awards Program, NACC

Scaled the awards program from 2 to 13 annual awards, a 359 percent increase over three years, managing RFA development, eligibility verification, platform transition, and Scientific Review Committee panels. Designed and promoted a mentorship program built from scratch, recruiting 111 expert AD/ADRD mentors and building the evaluation and tracking framework.

Research Education Landscape Study, NACC

Designed a research study of research education across the 37-center ADRC ecosystem to identify best-in-class training and funding programs, establishing the evidence base for how NACC supports new and early-career investigators nationally.

NACC Directory, NACC

Lead technical updates, UX and UI improvements, and troubleshooting; developed on-demand video training and delivered group and individual sessions. Achieved 100 percent validation of ADRC contact information across 1,500+ variables for all 37 research centers, establishing the Directory as the central collaboration hub for the Alzheimer's research community.

ADRC Meetings Communications and Outreach, NACC

Drove 331 percent growth in meeting attendance, from 320 to 1,379 research professionals between 2021 and 2026, through targeted outreach within a niche scientific community. Set attendance records at every bi-annual ADRC Meeting since 2021, then trained a successor into the role.

amyyoung.me, Personal Site and Build Pipeline

Designed and built the site in Astro and Tailwind, then encoded the delivery path itself as agent skills: authored Claude Code skills that carry the design system, gate every change on a type check and a production build, and run the staging-to-production deploy loop. Both versions of this resume ship through it.

EDUCATION

Master of Science, Information Management

University of Washington, June 2024

Specializations: Data Analytics and Business Intelligence; Program and Product Management

Bachelor of Arts, Sociology and Statistics

University of Minnesota, June 1991

ADDITIONAL

Award: Certificate of Appreciation, National Institute on Aging Division of Neuroscience, 2021, for contributions to NACC's Uniform Data Set v4.

Professional Memberships: University of Washington AI Community of Practice; HITLAB Center for AI Testing and Evidence; American Health Information Management Association (AHIMA); International Association of Privacy Professionals (IAPP); Data Management Association (DAMA).

Community: Board Member, Delridge Neighborhood Development Association, 2015 to 2026, a Seattle organization providing affordable housing and free arts, sports, and nature programming for young people.
